

11th CIRP Conference on Photonic Technologies [LANE 2020]

Virtual LANE – more than just attending a video call and viewing a live stream

The program for the 11th CIRP Conference on Photonic Technologies [LANE 2020]

September 07-10, 2020, www.lane-conference.org, is out now:

www.conftool.com/lane-conference-2020/sessions.php .

Please note: All presentations will be available as live streams on demand as well as live talks. Therefore, you have access to all presentations, independent from your time zone.

As the situation with Covid-19 makes it impossible to hold LANE as an on-site event this year, the organizers don't want to be stopped by this and decided to convert LANE into a virtual and interactive conference. Participants can expect high-class keynote speakers, plenary discussions on hot topics, a socializing event, a virtual bar, random chat, art gallery, discussion and breakout rooms, attendees' profiles, a sponsors' and partners' platform and more.

Here you get an idea of the look and feel of the event platform hosted by iChair:
