

LAMP2006

The 4th International Congress on Laser Advanced Materials Processing

Presents

The LPM2006 Outstanding Student Paper Award (Poster)

To

Mr. M. Duocastella

Universitat de Barcelona, Spain

for the paper entitled

*"Droplet ejection through laser-induced forward transfer
for biomolecules microarrays printing"*

Mr. J. Yamada

Toyo University, Japan

for the paper entitled

*"Fabrication of micro fluidic devices for blood test
by laser ablation and resin-film lamination"*

The HPL2006 Outstanding Student Paper Award (Oral)

Mr. Hyunbyung Chae

KITECH, Republic of Korea

for the paper entitled

"Development of hybrid laser-rotating arc welding process"

The LPM2006 Outstanding Student Paper Award (Oral)

Mr. Max Groenendijk
University of Twente, The Netherlands
for the paper entitled
"Influence of heat accumulation on surface microstructuring
during femtosecond pulsed laser ablation"

Ms. Mizue Mizoshiri
Osaka University, Japan
for the paper entitled
"Three-dimensional lithography
using a self-trapped filament of femtosecond laser pulses"

Mr. Dongkeon Lee
Osaka University, Japan
for the paper entitled
"LCD micro stereolithography of conductive micro shapes
using silver particles photosensitive resin"
