

DOWA Techno-Fund:

DOWA Holdings provides funding and other support for joint R&D. By injecting new expertise, DOWA Holdings will assist to energize and boost ongoing our and your R&D to new steps.

Environmental Management & Recycling	Nonferrous Metals	Electronics Materials	Metal Processing	Heat treatment
<ul style="list-style-type: none"> CO₂ capture, utilization, storage technologies Recycling of waste materials Hazardous materials detoxification 	<ul style="list-style-type: none"> Energy saving recovery of precious metals Production of alternative fuels Separation and solidification technologies of repellent elements (Br, Cl, F, As, Se, Hg, etc.) 	<ul style="list-style-type: none"> Oxide-based all-solid-state lithium battery materials Manufacturing technology of magnetic particles for biosensing Semiconductor deposition tech. (UV/IR-LED or PD) 	<ul style="list-style-type: none"> Microstructure control technology (Cu and Al alloys) Metal-ceramics/metal bonding technology Composition, microstructure and shape control of plating 	<ul style="list-style-type: none"> High speed deposition technology for DLC Composition, structure, and shape control technologies for DLC films NH₃-H₂ burner control technology
