

OKAMOTO OPTICS

株式会社 オカモト オプティクス

<https://apertureos.com/precision-optics/okamoto-optics-solutions/>

Okamoto Optics manufactures a broad range of custom optics from ceramic gain media for lasers, to high-precision large windows, aspheric lenses, and mirrors. Okamoto Optics collaborates with Plymouth Grating Laboratory to produce high damage threshold diffraction gratings.

- ◎ Large Aperture Interferometry
- ◎ Optics Capacity to over 1 meter
- ◎ MRF aspheric polishing
- ◎ Specialty materials capability
- ◎ High damage threshold coatings
- ◎ Vertically integrated manufacturing

Okamoto Optics has been in business for 80 years and is comprised of a dedicated team of professionals networked with large universities, research institutes and major industrial companies. Okamoto Optics is represented by its partner company Aperture Optical Sciences for international sales and support,
