Table-Top Exhibitions and Catalog Display Opportunities

Welcome to join us at LAMP2019!

The International Congress on Laser Advanced Materials Processing (LAMP) deals with science and technology of advanced laser materials processing covering precision microfabrication and high power laser processing. LAMP2019 is held during MAY 21-24, 2019 in Hiroshima, Japan. LAMP2019 consists of International Symposia on Laser Precision Microfabrication (LPM) and High Power Laser Processing (HPL) and covers hardware as well as software for fundamental research and industrial applications in both micro and macro processing. LAMP2019 is planned as a four-day event with a Plenary Session, LPM 20th Year Anniversary Session, Oral and Poster Sessions, Special Sessions dealing with topical issues, and the exhibition with inviting most important world authorities in this field. The aim of this congress is to provide a forum for discussion of fundamental aspects of laser-matter interaction, the state-of-the-art of laser materials processing, and topics for the next generation with fundamental scientists, end users and laser manufactures. We expect that LAMP2019 would play an important role not only for understanding fundamental knowledge of laser materials processing but also forecasting future technologies to be developed and the future laser market.

We would like to encourage you to become LAMP2019 exhibitors. We hope that the Exhibitions will strongly assist you to extend your world-wide business opportunities. For the details, please refer to the following pages. Thank you for your attention in advance.
